

CLAIMS

What is claimed is:

1. A remote control device, comprising:
a feedback device for receiving signals from an electronic device, the feedback device
5 including:

a receiver;

a processor in communication with the receiver; and

an output device in communication with the processor.

10 2. The device of claim 1, wherein the output device includes at least one of a light source, an LCD display, an LED display, and a speaker.

3. The device of claim 1, wherein the feedback device is located on a housing of the remote control device.

4. The device of claim 1, wherein the feedback device is located in a housing of the remote control device.

15 5. The device of claim 1, wherein the feedback device is for displaying one of a weak signal indication and a low batter power indication.

6. The device of claim 1, wherein the remote control device is a universal remote control device.

20 7. A feedback device attached to an electronic device, the feedback device for providing feedback to a user in response to inputs entered into a remote control device, the feedback device comprising:

a receiver;

a processor in communication with the receiver; and

an output device in communication with the processor.

8. The device of claim 7, further comprising an input device in communication with the processor.

5 9. The device of claim 7, further comprising a storage area in communication with the processor.

10. The device of claim 7, wherein the output device includes at least one of a light source, an LCD display, an LED display, and a speaker.
